

Crystal Wireless Probe

Gamma probe for radioguided surgery

- outstanding sensitivity
- excellent side shielding
- shock resistant
- very fast setup

operating with:

- All Crystal Probe Systems
- Computers (Windows®)
- Smartphones* (Android®)

reliable | versatile | easy to use | made in Germany

Crystal Probe - count on it.

Sensitivity: > 18.000 cps/MBq | Length: 240 mm
Side shielding: 99,97 % @ ^{99m}Tc | Weight: 200g
Face Diameter: 15 mm | Connection: Bluetooth
Shock Resistant: survives a 1.2m drop
Made of surgical stainless steel with integrated tungsten collimator

Angular resolution: < 40°
Local resolution: 15 mm FWHM (dist. of 1 cm)
Max. wireless transmission distance: 10 m
Operation Time: 14h (powered by a regular CR123 cell) -- after "battery low" signal: 1.5h

* not available at launch

Crystal Photonics GmbH / Albert-Einstein-Straße 16 / D-12489 Berlin, Germany
